

# Artemia Super Red (Special Hatching Conditions)

Illuminate the tank for the 1st 10 hours of hatching. Either by LED lights or indirect sunlight.

Strong aeration is need to keep artemia from sinking to the bottom of the tank. This is very very important. The strong aeration and the position of the air stones are very important.

**HATCHING CONDITIONS:**  
 \*TEMPERATURE : < 30°C  
 \*SALINITY : 20 ~ 30ppt  
 \*ILLUMINATION : 2000lux  
 \*PUT IN HATCHING POWDER WHEN HATCHING  
 \*CONTAINER : AS SHOWN

**BEFORE HATCHING**  
 When store freezer can last for 2 years. However you Must take out the artemia from the freezer and put in room temperature for 2 days before you hatch the artemia.

Artemia Super Red **MUST** use hatching powder!  
 1 packet of Super Red + 1 packet of hatching powder in water volume of **200-250L**.

First 10 hours of artemia hatching **MUST** use LED light or some indirect sunlight.
